

Call it the end to unappealing, hard-to-read financial data.

With **Advanced Printer Control**, you'll add logos, boxes, signatures, and other graphical elements to your reports with ease.

Advanced Printer Control is designed to work with all Kintera FundWare modules and supports MICR-encryption for check-generation, allowing a single check stock to be used for multiple checking accounts. Bitmap files, stored authorized signatures, logos, and graphics are also accommodated easily.

FEATURE HIGHLIGHTS:

Standard Printing and Graphics Features

Full MICR support – Advanced Printer Control supports software for MICR check printing.

Windows print drivers – Advanced Printer Control prints directly to Windows print drivers, allowing for a simple and familiar interface.

Form distribution – You can print Payroll and AP checks from any laser printer without purchasing additional hardware. Fax or e-mail your reports (with supporting software).

Flexible printing formats – Advanced Printer Control delivers the ability to print checks with two stubs, as well as the ability to define forms to print multiple copies with different images on each printed copy. This option is useful for automatically printing additional copies of checks for internal recordkeeping.

Pre-defined form templates – Pre-defined AP and Payroll check forms can be used as a starting point for you to design custom checks with logos, lines, boxes, etc.

Superior Customization and Functionality

Form setup utility – The form setup utility allows you to define what a form should look like and from where in the report the information is to be retrieved.

Unlimited forms – You can define as many forms as you need, starting from scratch or using sample AP and Payroll check forms.
